

- B2  
concl'd.
- b) transplanting the donor cells, tissue or organ, into the recipient, such that a rejection response by the recipient to the donor cells, tissue or organ, is inhibited.

Please amend claim 22 as follows:

- B3  
SVb  
C4
22. The method of claim 1, wherein the immunosuppressant is administered beginning from about 0 to 6 hours before the transplanting step [and continuing for up to several weeks after the transplant step].--
- Po AB

REMARKS

Original claims 11-21 and 23-25 are canceled herein without prejudice, and claims 1 and 22 are amended. The specification is amended herein to claim priority to a previously filed application. The amended claims incorporate some amendments made in the parent application and additionally provide that the anti-CD3-DT immunotoxin used in the claimed method comprises sFv-DT390. Support for the immunotoxin comprising sFv-DT390 can be found in the specification in Example 9. No new matter is believed to be added by these amendments.

The Examiner is invited and encouraged to directly contact the undersigned if such contact may enhance the efficient prosecution of this application to issue. No fees are believed to
